UNDERGROUND SOLUTIONS

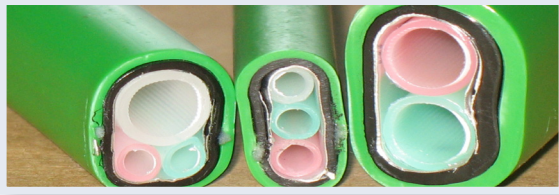

INTERIOR SOLUTIONS

**Your Fiber Optic & Cable
Installation Solution**

Specialties

BSE consistently delivers top quality products. Our service and adherence to project time lines ensure maximum productivity while exceeding outcomes and reducing costs to our clients. We specialize in solving the unique issues associated with complex projects and time sensitive actions. We are experts at making the most out of resources on hand, optimizing processes, and leveraging our inherent talents to exceed our customers' expectations.

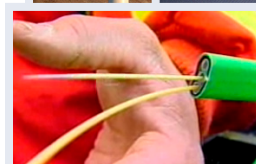

Equipment

BSE has taken the steps necessary to put the equipment in place to get the job done! Our in-house capacity to move equipment easily from site to site or state to state, allows for better control of project time lines. Having our own equipment and maintaining it provides better productivity than that of the rental fleets. We have the newest installation and testing equipment available, operated by trained technicians with safety in mind for every project we do.

The BSE Fiber & Cable Division

BSE Fiber & Cable is a full service licensed and bonded installation contractor of fiber optic and copper cabling. Our services span all 50 states with a highly skilled work force, and full complement of deployment & testing equipment. BSE Fiber & Cable specializes in air blown fiber solutions, is a certified installer for the Emtelle Fibreflow line of air blown products, We are also the certified construction partner, integrator and installer for the Lite Access Technologies full suite of slot cut, air blown, outside plant, inside plant and aerial plant products. With the huge advances in technology over the last few decades, communication systems have become an increasingly important part of our infrastructure. As companies, governments, and communities become increasingly dependent on these systems, it is paramount that they be reliable, quick, flexible and robust. Whether ISP, OSP, or AP, cross-town or cross-country, the BSE Fiber & Cable Division can deliver and install the innovative fiber optic and cabling solutions needed to exceed this challenge.

OSP - Outside Plant

Conventional and blown fiber cabling solutions that compliment the deployment of optical solutions deeper into the network delivering a future-proof infrastructure. We install a wide variety of transmission media including copper, fiber optic, twisted pair, baseband and broadband as well as associated components. We also install a variety of security systems and wireless applications including 802.11a, 802.11b, 802.11g cameras, WiFi, and VoIP. BSE's OSP solution will have your fiber optic network up in no time.

ISP - Inside Plant

Interior installation and maintenance involve challenges that are difficult to overcome; such as space constraint and network flexibility. Our skilled fiber techs and electricians will enable you to overcome these challenges, while meeting the most rigorous standards. BSE Fiber & Cable operates as a full service, turnkey communications source, we have the capability to provide our customers with virtually any service needed to support the design, deployment, and maintenance of all types of ISP networks. Our greatest

strength is the ability to meet the unique needs of clients with multi-site/multistate projects, while using our own equipment and resources. To excel at this requires coordinated project management, and means 24x7, single point-of-contact coverage, centralized material management, and streamlined communication. Our customers benefit from skills learned on past projects completed, including blown fiber, Cat 5/6, VOIP, spliced plant, MDU deployment. BSE's Fiber & Cable Division is simply "The Solution" to your next fiber optic or cable installation project.
